## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract exceeds the "150-words" limit. Correction is required. See MPEP § 608.01(b).

### *Allowable Subject Matter*

3. Claims 1-11 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or disclose calculating a coefficient representative of the stray radiation condition of a lithographic projection system based on measured intensity from a detector, wherein the detector is positioned substantially coincident with the image plane and wherein an expanded area obtained by a notional dilation over a distance of at least  $\lambda/NA$  of the detector aperture is covered by a predetermined feature image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure

Rykowski, et al. (US 2003/0169345) and Wright, et al. (US 6,716,646) each disclose a method that determines the stray light in an optical system.

6. This application is in condition for allowance except for the following formal matters:

The abstract exceeds the "150-words" limit.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
